

GAINI LAXMAN

Senior Software Engineer | Java Full Stack AI Engineer

gainilaxman20@gmail.com | 📞 +91-8555064001

LinkedIn: <https://www.linkedin.com/in/gaini-laxman-59510bb0>

Portfolio: <https://fortfolio-mu.vercel.app>

PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience in building scalable enterprise applications using Java, Spring Boot, and microservices architecture.

Strong expertise in designing REST APIs, optimizing system performance, and delivering Realtime business workflows across automotive, banking, and healthcare domains.

Hands-on exposure to AI/LLM-based development, including prompt engineering, AI-assisted coding, and building AI-powered features. Experienced in integrating modern AI tools to enhance developer productivity and application capabilities.

PROBLEM SOLVING

- Solved 300+ DSA problems
- Strong in Arrays, Strings, Sliding Window, Two Pointers, HashMap
- Focus on time & space optimization

AI & LLM SKILLS

Hands-on with LLM tools like **Codex**, **GitHub Copilot**, **Claude**

- Experience in prompt engineering for code generation and problem-solving
- Built AI-assisted workflows for development productivity
- Understanding of LLM concepts: tokens, embeddings, RAG (basic level)
- Familiar with integrating AI APIs into applications (basic exposure)

TECHNICAL SKILLS

Backend:

Java 8/11/17/21, Spring, Spring Boot, Spring MVC, JDBC, Servlets, Spring security, Jwt, Spring Batch, Spring Data JPA, XML, Json, Hibernate, Microservices, REST APIs, NodeJS, Postman, Swagger.

Build Tools: Maven, Gradle.

Web Servers: Tomcat, Zetty, WebLogic.

IDE's: Eclipse, STS, IntelliJ IDEA, VS Code.

Others:

Git, JIRA, Bit bucket, Jenkins CI/CD, SonarQube, Log4j, JUnit, Jest, Jasmine and karma, Jacoco, Putty, Mockito,

Frontend:

Angular 17, React 18, TypeScript, JavaScript, HTML, Tailwind CSS, Bootstrap, JSP, Angular Material

Cloud & DevOps:

AWS (EC2, S3, RDS, Lambda, IAM, VPC, Route53, EKS, ECR, ECS, CloudWatch), Docker, Kubernetes, Jenkins CI/CD

Messaging:

Kafka, SQS, SNS

Database:

MySQL, Oracle, PostgreSQL

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Apexon

Apr 2025 – July 2026

- Designed and developed REST APIs for real-time business workflows (customers, invoices, inventory)
- Improved API performance by **30%** through query optimization
- Built microservices architecture for scalable modules
- Integrated third-party APIs for real-time data processing
- Applied AI-assisted development tools (Copilot/Codex) to improve development speed and code quality, Postman, Swagger.
- Optimized frontend performance using Angular with Typescript and React with JavaScript
- Handled complex real-time workflows with concurrent users and optimized application responsiveness
- Java 11/17/21, Spring, Spring Boot, Spring Data JPA, Hibernate, Microservices, REST APIs.
- Angular, React, TypeScript, JavaScript, HTML, Tailwind CSS, Bootstrap.
- AWS (EC2, S3, RDS, Lambda, IAM, VPC, Route53, EKS, ECR, CloudWatch)
- Docker, Kubernetes, Jenkins, Kafka, SQS, SNS, MySQL, PostgreSQL.
- **Testing:** JUnit, Mockito, Jest, Jasmine, Karma, Unit Testing, Integration Testing.
- Hands-on with LLM tools like **Codex, GitHub Copilot, Claude.**

Software Engineer – Caspex Tech LLP

Nov 2023 – Mar 2024

- Developed backend services for fraud detection systems
- Designed scalable APIs and handled high-volume data processing
- Built UI components using Angular and React
- Automated workflows using batch processing
- Java 11/17, Spring, Spring Boot, Spring Data JPA, Hibernate, Microservices, REST APIs.
- React, TypeScript, JavaScript, HTML, Tailwind CSS, Bootstrap, Angular Material.
- AWS (EC2, S3, RDS, Lambda, IAM, VPC, Route53, EKS, ECR, CloudWatch)
- Kubernetes, Jenkins, Kafka, MySQL, Oracle.
- **Testing:** JUnit, Mockito, Jest, Jasmine, Karma, Unit Testing, Integration Testing.
- Hands-on with LLM tools like **Codex, GitHub Copilot.**

Senior Software Engineer – CGI

Jun 2022 – Nov 2023

- Developed microservices and REST APIs for financial systems
- Worked on distributed architecture and event-driven systems
- Java 8/11/17, Spring, Spring Boot, Spring Data JPA, Hibernate, Microservices, REST APIs.
- Angular, React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, Angular Material.
- AWS (EC2, S3, Lambda, EKS, ECR, CloudWatch)
- **Testing:** JUnit, Mockito, Jest, Jasmine, Karma, Unit Testing, Integration Testing.
- Docker, Kubernetes, Jenkins, Kafka, MySQL, PostgreSQL

Software Engineer – TRION INFOTECH PVT LTD

May 2018 – Jun 2022

- Migrated legacy systems to modern Java architecture
- Developed REST APIs and UI modules
- Built automation workflows
- Java 5/8/11, Spring, Spring Boot, Spring Data JPA, Hibernate, Microservices, REST APIs.
- Angular, React, TypeScript, JavaScript, HTML, CSS, Bootstrap, Angular Material.
- AWS (EC2, S3, RDS, Lambda, Route53, EKS, ECR, CloudWatch)
- Deployed containerized microservices using **Docker and Amazon EKS**
- Docker, Kubernetes, Jenkins, Kafka, SQS, SNS, MySQL, PostgreSQL, Oracle
- **Testing:** JUnit, Mockito, Jest, Jasmine, Karma, Unit Testing, Integration Testing.

PROJECT EXPERIENCE

Shop Manager (Automotive Domain)

Built full-stack application managing customers, vehicles, invoices, inspections, and inventory

- Designed scalable backend services using Spring Boot and microservices architecture
- Improved system performance by optimizing API calls and database queries
- Integrated external APIs for real-time parts availability and ordering
- Implemented event-driven architecture for real-time updates

- Developed responsive UI for web and mobile using Angular and Reactjs with Typescript and JavaScript
- Deployed containerized microservices using Docker and Amazon EKS
- Amazon RDS for relational database management and transaction data storage.
- AWS IAM and VPC for access control and secure network configuration.
- Amazon CloudWatch for monitoring application logs, metrics, and service
- **Testing:** JUnit, Mockito, Jest, Jasmine, Karma, Unit Testing, Integration Testing.

Precise ID, Fraud Detection System (Banking Domain)

- Integrated multiple fraud detection modules into a unified system
- Developed backend services for real-time validation and high-volume transaction processing
- Designed scalable workflows ensuring reliable fraud detection
- Designed scalable backend services using Spring Boot and microservices architecture
- Developed responsive UI for web and mobile using Angular and Reactjs with Typescript and JavaScript
- Deployed containerized microservices using Docker and Amazon EKS
- Amazon RDS for relational database management and transaction data storage.
- AWS IAM and VPC for access control and secure network configuration.
- Amazon CloudWatch for monitoring application logs, metrics, and service
- **Testing:** JUnit, Mockito, Jest, Jasmine, Karma, Unit Testing, Integration Testing.

Mutual Funds Management System (Funds360)

- Developed microservices and REST APIs for mutual fund operations
 - Implemented backend logic for transaction processing and reporting
 - Ensured high system reliability and performance
 - Designed scalable backend services using Spring Boot and microservices architecture
 - Developed responsive UI for web and mobile using Angular and Reactjs with Typescript and JavaScript
 - Deployed containerized microservices using Docker and Amazon EKS
 - Amazon RDS for relational database management and transaction data storage.
 - AWS IAM and VPC for access control and secure network configuration.
 - Amazon CloudWatch for monitoring application logs, metrics, and service
 - **Testing:** JUnit, Mockito, Jest, Jasmine, Karma, Unit Testing, Integration Testing.
-

IES – Integrated Eligibility System (Healthcare Domain)

- Built large-scale application for insurance eligibility and claims processing
 - Developed REST APIs and UI modules
 - Improved processing efficiency through optimized backend logic
 - **Testing:** JUnit, Mockito, Jest, Jasmine, Karma, Unit Testing, Integration Testing.
-

Legacy System Modernization (AIG Project)

- Migrated legacy applications from Java 5 to Java 8
 - Refactored codebase for better maintainability and performance
 - Developed REST APIs and modernized system architecture
-

Education Details

- M.Tech, JNTUH — 2014–2016 (Completed in December 2016)
-

KEY ACHIEVEMENTS

- Improved system performance by **30%**
 - Reduced manual effort by **40%**
 - Delivered faster releases using CI/CD pipelines
-

CERTIFICATIONS

- Oracle Certified Professional
 - AWS Certified Cloud Practitioner (2025)
 - AI & LLM Engineering Certification
-

ADDITIONAL INFORMATION

- Strong understanding of system design
- Experience working in Agile teams
- Passionate about combining backend engineering with AI capabilities
